

AIMS AND SCOPE

With 12 issues per year, the Theoretical Physics section of the *Annales de l'Institut Henri Poincaré* publishes original articles dealing with all aspects of theoretical physics and mathematical physics, as well as papers in pure and applied mathematics in conjunction with problems presented by physics.

INSTITUT HENRI POINCARÉ / GAUTHIER-VILLARS PRIZE

The *Institut Henri Poincaré* and the *Éditions Gauthier-Villars (ESME)*, in collaboration with the *Centre National de la Recherche Scientifique (CNRS)*, are awarding three annual prizes of 10,000 French Francs, in June of each year, at the *Institut Henri Poincaré* in Paris, France.

Since 1995, this prize recognizes an article published during the year preceding that in which the prize is given. It awards articles in each of three series of the *Annales de l'Institut Henri Poincaré* (Theoretical Physics, Probability and Statistics, Nonlinear Analysis), with particular attention given to innovative articles.

The authors of the award-winning articles are invited to present their work in a conference preceded by the awarding of the prizes.

The awarded articles are available on the web:
<http://www.gauthier-villars.fr>

AWARDED ARTICLES IN SERIES A/THEORETICAL PHYSICS

1995 - L. Chierchia, G. Gallavotti

Drift and diffusion in phase space (Vol. 60, 1994)

1996 - V. Jaksic, C.A. Pillet

On a model for quantum friction I. Fermi's golden rule and dynamics at zero temperature (Vol. 62, 1995)

1997 - F. Merle

Nonexistence of minimal blow-up solutions of equations $iu_t = -\Delta u - k(x)|u|^{2/N}u$ in \mathbb{R}^N (Vol. 64, 1996)

1998 - A. Bachelot

Quantum vacuum polarization at the black-hole horizon (Vol. 67, 1997)
