

Séminaire des doctorants en Théorie des Nombres
"Jouve-Pazuki"

Bordeaux, IMB - Jeudi 21 mars 2012, 14h, salle 286

Overconvergent modular symbols

GUHAN VENKAT

In this talk, we will review the definition and arithmetic properties of overconvergent modular symbols. We will also discuss Glenn Stevens' control theorem and how that can be used to extract the p -adic L function of a modular form.
